

## **Charting the course of Parkinson's disease and referral to allied health: Insights from people with Parkinson's disease**

***Volunteers with Parkinson's disease*** (and where appropriate, their care partners), are needed for a research study investigating when and why people with Parkinson's disease are referred to allied health. We will be looking at the journey of people with Parkinson's disease from the time of their diagnosis to the present.

This study will involve:

- Filling in a questionnaire about your Parkinson's disease
- Participating in 2 interviews
- Completing a Parkinson's disease diary in between interview sessions

This study is being conducted by a team of researchers from the University of Sydney as part of the basis of Ms Cassandra Wong's Doctor of Philosophy (Medicine and Health) studies, supervised by Dr Serene Paul.

To take part in this study, please scan the QR code below or click this link:
